

Calibration arena 21 x 93 cm

Print on 6 landscape A4 sheets and join them with tape.

1. Print settings

LANDSCAPE orientation, 100% scale.

Turn off "fit to page" / "shrink oversized pages".

Check the ruler printed on every sheet: it must measure exactly 100 mm.

2. Preparation

Trim each sheet along the solid line at the bottom.

Do not trim the top edge: that 1.5 cm flap is the overlap area.

The vertical dashed lines mark the corridor edges (21 cm): trim there if you need the exact width.

3. Assembly

Start from sheet 1 (START) and work upwards in order.

Lay the trimmed edge of sheet n+1 onto the horizontal dashed line of sheet n, matching the registration crosses on both sides.

Tape from the back; on the front use matte tape only, to avoid specular reflections.

4. Walls

The four "PLACE WALL HERE" labels mark where the vertical walls of the channel stand: the two long sides along the 21 cm edges, plus one at START and one at the 93 cm end. Walls sit ON the line, outside the floor, so the clear inner width stays exactly 21 cm.

The walls must be WHITE and MATTE, like the floor, so they do not create specular reflections or alter the readings of the reflective sensors.

5. Note on the black areas

The 8 cm end block uses a lot of toner, and laser black is often glossy. Alternatively print the outline only and fill it with matte black electrical tape, which is more uniform for reflective sensors.

Dimensions used

width 21 cm - total length 93 cm

START -> first band: 23 cm

black bands: 1.5 cm thick, 15 cm pitch (edge to edge), 4 of them

far-end black block: 8 cm, ending 2 cm before the end

<<< towards START

exactly 100 mm = correct scale

PLACE LEFT WALL HERE

overlap flap: lay sheet 2 on top of this area

PLACE RIGHT WALL HERE

START (0 cm) --- PLACE WALL HERE

<<< towards START

exactly 100 mm = correct scale

PLACE LEFT WALL HERE

overlap flap: lay sheet 3 on top of this area

PLACE RIGHT WALL HERE

CUT HERE --- edge at 15.5 cm from START

<<< towards START

exactly 100 mm = correct scale

PLACE LEFT WALL HERE

overlap flap: lay sheet 4 on top of this area

PLACE RIGHT WALL HERE

CUT HERE --- edge at 31.0 cm from START

<<< towards START

exactly 100 mm = correct scale

PLACE LEFT WALL HERE

overlap flap: lay sheet 5 on top of this area

PLACE RIGHT WALL HERE

CUT HERE --- edge at 46.5 cm from START

<<< towards START

exactly 100 mm = correct scale

PLACE LEFT WALL HERE

overlap flap: lay sheet 6 on top of this area

PLACE RIGHT WALL HERE

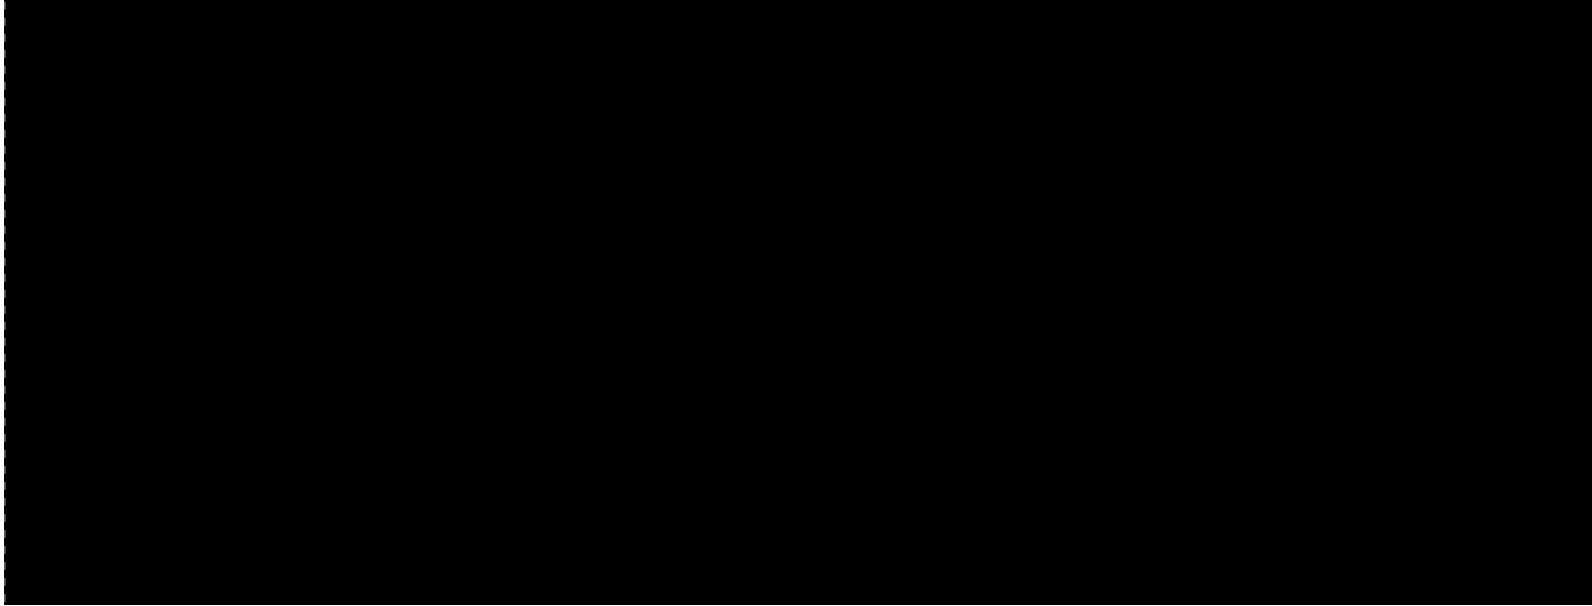

CUT HERE --- edge at 62.0 cm from START

<<< towards START

exactly 100 mm = correct scale

PLACE LEFT WALL HERE

PLACE RIGHT WALL HERE

END (93 cm) --- PLACE WALL HERE

CUT HERE --- edge at 77.5 cm from START
